Mitchell Malinin – Frontend Developer

Summary

Frontend web developer with 3+ years of experience. Skilled in building complex user interfaces coupled with a passion for learning blockchain technology. Aspiring to develop innovative & aesthetically pleasing web apps that will shape the future of society. Seeking an opportunity to contribute to a great team and cultivate my skills further.

Experience

Frontend Developer · Blockchain.com — Remote
November 2021 — July 2022

- Developed Blockchain.com's Exchange catered to 1M+ users with React, TypeScript, Redux (Saga, Toolkit), and Styled-Components
- Repaid technical debt by refactoring code into modern patterns and migrating state management to Redux Toolkit
- Built and deployed 10+ features boosting user experience via custom CI/CD pipelines to multiple environments, helping lead to $3M+ in monthly trading volume
- Wrote unit testing infrastructure using JEST to thoroughly test code
- Collaborated with different teams on product design and API interface discussions
- Planned and led a weekly internal NFT education class achieving weekly attendance of more than 20% of the company's staff

Frontend Developer · Hedge, Inc — Remote
August 2019 — July 2021

- Designed and developed Hedge web application with Figma and React architecture
- Implemented the design system using Styled-Components to create modular CSS components and improve code reusability
- Deployed application changes to AWS using Git command line interface via pipeline script
- Made critical development decisions about project changes and future application features
- Utilized agile methodology to manage development work, and communicated any blockers at daily scrums
- Hired, managed, and scaled engineering team across multiple countries

Security Intern · L'Oréal — Berkeley Heights, NJ
June 2018 – August 2018

- Developed a risk assessment manager for a web application using JavaScript, HTML, & CSS
- Worked with the security team to scan endpoint device vulnerabilities with Nessus

Notable Project

Hedge Web App · March 2020 — July 2021

Hedge is a fantasy sports platform that allows you to use your spare change in daily fantasy contests to potentially win higher returns.

Project Specifications:
- Redesign of legacy frontend web application modeled after Hedge iOS app
- Development of new Hedge web application using React.js
- Full tech stack includes: Node.js, PHP, MongoDB, MySQL, Docker, and AWS

Technologies Used:
- Frontend: React.js & Styled-Components
